DuploCOLL® 5110

Art. No. 11 00 85

Double sided adhesive mounting tape with low temperature resistant acrylic adhesive and foam carrier

Product construction				
	Name	Colour	Thickness [mm]	
Liner	Polyethylene film	yellow	approx. 0,10	
Adhesive covered side	Modified acrylic			
Carrier	Polyethylene foam	white	approx. 1,00	
Adhesive open side	Modified acrylic			
		Total thickness:	approx. 1,10	

Product advantages

- The adhesive is distinguished by its excellent cold shock resistance. Thus the application of DuploCOLL® 5110 is possible even
 at very low temperatures.
- · Good initial and final adhesion
- High shear strength
- Good ageing resistance and extensive resistance to the influence of chemicals (domestic cleaning materials and polishing agents).
- The combination of a modified acrylic adhesive and a compressible polyethylene foam guarantees very good bonding even on rough and uneven surfaces.

Main application fields

- Mounting of building profiles (e.g. plaster profiles)
- Making extruded plastic profiles self-adhesive
- Used for door and window applications

DuploCOLL® 5110

Art. No. 11 00 85

Double sided adhesive mounting tape with low temperature resistant acrylic adhesive and foam carrier

Specific technical data*

Temperature range -40 °C to +90 °C -40 °C to +110 °C Temperature range in a rising heat test

Cold shock resistance No loss of adhesion at -10 °C

ift test report 104 28492 dated 28 June 2004***:

Test of air impermeability and driving rain impermeability in accordance with DIN 18542, chapter 7.2 and 7.3

Air impermeability Air impermeable up to 600 Pa Driving rain impermeability No water entering up to 600 Pa

DuploCOLL® 5110 has a μ-value of 9000.

This is consistent with a Sd-value of 81,0 m at a tape width of 9 mm and a Sd-value of 135,0 m at a tape width of 15 mm.

^{*} Specific test results, statistically not approved.
*** The data and results given relate solely to the described, tested object. Weathering and ageing phenomena have not been considered

DuploCOLL® 5110

Art. No. 11 00 85

Double sided adhesive mounting tape with low temperature resistant acrylic adhesive and foam carrier

Technical Data			
Shear strength	on steel according to DIN EN 1943, edition 1996, at +23 °C +/- 2°C	40 N/625 mm²	
Peel strength	on steel according to DIN EN 1939, edition 1996, at +23 °C +/- 2°C	20 N/25 mm	- III

Application	
Application guidelines	www.lohmann-tapes.com

Storage

Adhesive tapes should be stored at room temperature and normal humidity (50-70 %).

The storage stability is one year after delivery.

Product presentation					
Converted product	Rolls			Spools	
Width [mm]	> 6			on reguest	
Length [m]	25				
Max. log width: 1260 mm	Other dimensions, die-cuts and sheets on request.				

For mechanical mounting of this adhesive tape we also offer a wide range of application devices.

The physical characteristics contained in our data sheets represent typical or average values. They do not represent any warranties or guarantees and must not be used for technical specification purposes. All application related statements, information and recommendations herein are given to the best of our knowledge and practical experience. The buyer is responsible for determining the suitability of the specific tape for its intended use in connection with user's method of application. Please consult our Technical Applications Department for specific advice. Our general Term and Conditions of Sale apply, particularly with regard to warranty and liability.

Date of issue: May 2011
